TERM 1— 3rd September 2026 - 23rd October 2026

TERM 2— 2nd November 2026 - 18th December 2026

TERM 3— 5th January 2027 - 12th February 2027

TERM 4— 22nd February 2027 - 25th March 2027

TERM 5— 14th April 2027 - 28th May 2027

TERM 6— 7th June 2027 - 21st July 2027

Hérons Residential

On Thursday 4th June, Herons children had an early start ready for their residential. Leaving school at 6.30am, the children had a long journey to Go Ape in Delamere. The children were very excited about their first activity up in the trees. After putting on the safety harnesses, the children listened to a safety briefing so that they all knew the rules for taking part. Off they went—everybody completed at least the first level of the course, with many overcoming their fears and going on to level 2 and level 3. After that, it was off to Alderford aqua park to have fun in the water on the inflatable obstacle course. Once again, some children were a little nervous about getting into the lake, but by the end of the session all children were having a fantastic time! Feeling tired, we then headed to Cloverley hall for a BBQ, shower, movie, midnight feast and then bedtime! Very quickly, breakfast time arrived and the children refuelled ready for the day ahead. Chester Zoo was our next stop, visiting all sorts of different animals and taking part in an interesting workshop about evolution. Over the two days we were incredibly lucky with the weather, and although the clouds looked threatening at times, we managed to stay dry! On the journey home we stopped at the service

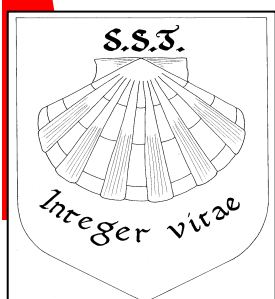

station for a delicious meal at McDonalds, finally arriving home at approximately 8pm. A busy, fun packed and exhausting 2 days. A huge thank you to the staff that came along to enable the visit to happen! We were very proud of the children and how well they all behaved during the visit.

Swans Science Visit

Swans class had a fantastic visit to the Cambridge Science Centre in Wisbech, where we learned all about forces and space. During the visit, we explored how much energy is needed for a rocket to travel into space and discovered the challenges of launching beyond Earth's atmosphere. We also delved deeper into the International Space Station, learning about the daily lives of astronauts and how they live and work while in space. The class thoroughly enjoyed the hands-on activities and exciting discoveries, making it a memorable and educational experience for everyone!
